

## LLC «Dikorosy Primorya DV»

The "Wild Flora of Primorye Far East" Project began implementation in 2011. In collaboration with "Pacific Management Company," LLC "Wild Flora of Primorye Far East" explored innovative potential to identify and invest in projects with an innovative foundation. During this work, it became clear that despite the presence of substantial infrastructure (Far Eastern Branch of the Russian Academy of Sciences, industry-specific institutes like TINRO, and the established Far Eastern Federal University), there was no real integration of scientific developments into economic practice. This led to the idea of creating a business that would allow scientists to practically apply their research and make it accessible to a wide range of consumers. We gathered the most interesting and "time-tested" solutions in the field of prevention and united them under the common brand "Wild Flora of Primorye." Currently, the company offers a diverse range of preventive products: syrups made from hawthorn, lingonberry, viburnum, raspberry, schisandra, blueberry, eleutherococcus with rosehip; syrups from ginseng and chaga; honey with various additives from wild plants and marine products (chaga, eleutherococcus, ginseng, sea cucumber); jams from schisandra, lingonberry, and viburnum; Japanese kelp, fibers from brown algae and seagrasses (nanostructured); various extracts from bivalve mollusks, salmon milt, squid nerve cells, salmon liver, sea cucumber, a product from sea urchin roe, chitosan from Kamchatka crab and sea cucumber shells, calcium vitabalance, etc.

### List of Goods/Services with HS Codes:

2009898600 – syrups from hawthorn, lingonberry, viburnum, ginseng, raspberry, schisandra, chaga, blueberry, eleutherococcus with rosehip, rosehip, sea buckthorn, chokeberry, honeysuckle  
409000000 – honey with chaga, eleutherococcus, ginseng, sea cucumber and anti-honey  
2008996708 – jam from schisandra, lingonberry, viburnum  
2008996708 – jam from schisandra, lingonberry and viburnum  
1212210000 – fibers of brown algae, fibers of sea grasses (nanostructured), Japanese kelp  
2106909809 – extract from bivalve mollusks, extract from salmon milt, extract from squid nerve cells, extract from salmon liver, extract from sea cucumber, extract from cartilage tissue of squid and salmon, product from sea urchin roe, chitosan from Kamchatka crab shell, chitosan with sea cucumber, calcium vitabalance

### Export Countries:

- China

### Company Information:

- **CEO/Head's Full Name:** Moskaev Evgeniy Nikolaevich
- **Contacts:** Telefon/ whatsapp: +7 908 9935660 2263923@mail.ru
- **Export Industry:** Industrial Export
- **Legal and Physical Address:** 690014, Primorskiy kray, g.Vladivostok, ul. Narodnyy pr-kt. d.27, 131
- **TIN:** 2543037399
