LLC "VLADFORUM"

Multipurpose high-temperature greases designed to protect against scuffing and wear, increase the time between repairs and restore the surfaces of food equipment parts.

Forabio multipurpose greases based on UPTFE-Forum® were developed to provide excellent lubrication and protection of food equipment. Applicable to all types of industrial food equipment and their parts (rolling and sliding bearings, gearboxes of all types, chain drives, sliding surfaces of food equipment).

Forabio greases form a stable coating on process surfaces that can work even in the absence of the greases themselves, have high mechanical stability, and are practically not heat-hardened. Have an extended service life.

List of Goods/Services with HS Codes:
