

IP Kutishchev A.V.

IP "Kutishchev A.V." is a manufacturer of polyurethane suspension parts supplied as replacement (spare) parts for after-sales maintenance of vehicles, under the "No Wear" trademark. In the "No Wear" brand stabilizer struts, the ball joint is replaced with a silent block, the bolt is filled with polyurethane and pressed into the housing (the silent block principle is used), the bolt moves due to the elasticity of the material. Stabilizer struts with a polyurethane elastic element are our patented development Patent No. 101119. Due to the absence of rubbing parts (hinge), the service life is increased by 4 times. No hinge, no boot required ... not afraid of dirt and dust. Stabilizer struts of the "No Wear" brand, due to the elastic element, help to align the car when turning, making it safer and more maneuverable. Wear resistance. High-quality polyurethane products last longer than those made of soft rubber. Under normal conditions, parts can last 50-100 thousand km, when driving off-road and with an aggressive driving style - 25-50 thousand km. Elasticity. Polyurethane parts hold their shape well, which ensures greater suspension stability. Resistance to aggressive environments. Polyurethane parts are not afraid of oils, gasoline, road reagents and UV radiation. Abrasion resistance. Suitable for use in severe weather conditions. Polyurethane, unlike rubber, does not crack in the cold and does not dry out in the hot summer. List of products

Polyurethane stabilizer bushings, polyurethane stabilizer struts, polyurethane silent blocks, polyurethane car spacers.

List of Goods/Services with HS Codes:

390950 - polyurethanes

Export Countries:

- China

Company Information:

- **CEO/Head's Full Name:** Kutishchev A.V.
- **Contacts:** +79644323370 , alkut@mail.ru
- **Export Industry:** Industrial Export
- **Legal and Physical Address:**
- **TIN:** 251703525628
- **Website:** <https://xn--80ajgdxdhye.xn--p1ai/about/>
