

IP Kondrov Ilya Igorevich

IE Kondrov I.I. has established a unique production of natural fruit vinegars from apples, pears, birch, plums, and grapes. Apple vinegar is the flagship product, accounting for 75–80% of production, while other varieties complement the lineup. Apple vinegar is made from fermented juice obtained through the fermentation of crushed apples and honey. More and more people are discovering fruit vinegars as a versatile home remedy for various ailments. Hippocrates himself used apple vinegar to fight infections, treat wounds, and relieve coughs. Its health benefits include improved digestion, reduced blood sugar, enhanced hair health, muscle cell strengthening, weight loss support, and culinary use. The company is expanding the domestic market and plans to export to China, Japan, South Korea, Vietnam, Kazakhstan, India, and Taiwan.

List of Goods/Services with HS Codes:

2209009100 - fruit vinegar (apple, pear, birch, plum, grape)
