

LLC «Eurostandart»

The logging and wood-processing enterprise **Eurostandard LLC** is located in the Krasnoarmeysky District of Primorsky Krai (Russian Far East), 500 kilometers from the port of Vladivostok.

Eurostandard LLC was established in 2000 and is now one of the leading enterprises in Primorsky Krai for deep wood processing.

The company owns two forest plots, a necessary vehicle fleet, three sawmills, four workshops, drying chambers with a capacity of 400 m³, storage facilities, and qualified specialists.

Annually, the enterprise harvests up to 29,000 m³ of hardwood (oak, ash), coniferous wood (fir, spruce), as well as birch, linden, and elm. The leased forest area is 49,091 hectares. The territory of the wood-processing enterprise covers 5.2 hectares.

Today, Eurostandard is equipped with modern imported machinery, enabling the production of high-quality, in-demand products. All manufactured products undergo strict quality control and sorting, with all items having a moisture content of 7–8% (unless otherwise specified).

At numerous exhibitions, including international ones, Eurostandard's products have been repeatedly awarded honorary diplomas and gold medals. The company exports lumber to China. The main short-term goal of Eurostandard LLC is a significant increase in production output and expansion of its consumer base in the international market.
