

## Integrated Metal Solutions Plant

The Complex Metal Solutions Plant (ZKMR) was launched in 2015. It consists of a 1,500 sq.m workshop built in-house and a 2,000 sq.m warehouse. Essentially, ZKMR is a wholesale plant engaged in serial production. All production lines were independently commissioned. When creating ZKMR, we knew its purpose was to solve client problems through innovative products. We understood our work would always operate in the "impossible" zone. But! We have innovative R&D, a strong engineering department, and unwavering production capabilities. Since 2022, ZKMR has been a Skolkovo resident.

The plant is unique because all production lines were developed in-house, with 90% having no direct analogs. We plan to introduce several more unique solutions to the market in the near future.

### List of Goods/Services with HS Codes:

---

7216911000 Profiled sheets, as well as everything available in our company's assortment (extensive list).  
Construction materials for exterior house finishing.
