

Woodenmap

WoodenMap is the first company in Russia and the CIS to produce 3D depth maps and wooden clocks.

Our company was founded in 2014, and since then, we have accumulated vast experience in manufacturing 3D maps and clocks, confidently establishing ourselves as market leaders.

Over 8 years of operation, we have delighted tens of thousands of clients worldwide—from New Zealand to Canada. Our maps have traveled on an icebreaker to the North Pole and flown to Africa to bring joy to their new owners. Among our clients are hundreds of companies and dozens of highly complex projects that no one else dared to undertake!

Extensive experience, a well-coordinated team, full-cycle production, and a streamlined raw material supply system allow us to create customized depth maps of any territory, complete with necessary markings and inscriptions.

We always consider our clients' feedback and share practical advice, leading to outstanding results.

We love what we do and value our reputation, which naturally reflects in our products—always a resounding success!

We love experimenting and gladly support our clients' adventurous ideas. Beyond our core business, we also produce other souvenir items, furniture, interior design, and offer material cutting and shaping services.

Clients worldwide trust us, and that speaks volumes!
