

JSC MMC Dalpolimetall

GMC "Dalpolymetal" is the only mining enterprise in Primorsky Krai producing lead and zinc concentrates. We pay special attention to the quality of our commercial products, which are well-known in the Asia-Pacific region.

GMC "Dalpolymetal" is a company with deep mining roots. We are distinguished by our highly skilled workforce and commitment to progress.

We strive to maximize the development of deposits while maintaining high standards of extracting base metals—lead and zinc—and also recover gold, silver, bismuth, and cadmium as by-products.

Geologists and miners at "Dalpolymetal" work daily to expand the mineral resource base, both at existing deposits and beyond. This ensures the company has resources for the next 25 years.

With significant growth potential, "Dalpolymetal" seeks to develop and implement advanced technologies in its operations.

Our mission is the comprehensive development of mineral resources in the Dalnegorsk ore cluster, creating value for shareholders, and providing jobs in our production areas.

Our strategy is based on the following principles:

- Expanding the mineral resource base by increasing reserves at existing deposits and developing new sites in northeastern Primorsky Krai;
- Implementing best practices in production management, mineral extraction, and processing;
- Improving economic efficiency by reducing production costs and increasing labor productivity, adhering to high safety and quality standards.
