

IP Golivets

The product "Collagen-reparative" is a natural collagen synthesis stimulator, a highly effective bioactive complex that has proven itself in cosmetology as an independent remedy for treating age-related involutional changes of the dermis. The complex can be used as an alternative to injectable and laser methods on its own or in combination with these age correction methods.

Even at the initial stage of use, it increases tissue elasticity and firmness. As a result, the skin acquires a healthy glow, beautiful matte texture, and becomes pleasantly soft to the touch.
