

LLC "Element Company"

Water «Mineralika» LLC «Company «Element» is a new product on the Russian market that can confidently compete with any water on the market. The quality of water raised from the earth's depths does not require additional purification and is one of the best waters in our country in terms of properties and mineral composition. The Mineralika water bottling plant and well No. 175 are located 2.5 km northwest of the village of Ussurka, Kirovsky municipal district, Primorsky Krai. The site and well location are connected to the regional center and other settlements of the region by road and rail (Shmakovka station). The plant and well are located in an ecologically clean resort area. Large industrial and agricultural enterprises are currently absent. According to GOST R 54316-2011 «Natural Drinking Mineral Waters», water from well No. 175 belongs to the II bicarbonate magnesium-sodium-calcium group of mineral waters and is an analogue of the Arkhyz hydrochemical type of table waters – the North Caucasus type of mineral waters.

The water is used for the prevention of stomach and duodenal ulcers, colitis and enterocolitis, and liver diseases. The chemical composition of the water approaches the concept of so-called "ecologically clean waters". The content of certain components is sufficiently balanced and favorable for the human body.

Characteristics:

- Affordable price;
- Has a soft pleasant taste;
- Chemical composition fits the definition of «ecologically clean water»;
- Optimally saturated with minerals and trace elements;
- Does not require artificial mineralization or additional water treatment;
- Advantageously differs by the absence of iron and increased silicon content;
- Extremely beneficial for the human body: improves metabolism, strengthens immunity, neutralizes toxins; used for the prevention of stomach and duodenal ulcers, colitis and enterocolitis, liver diseases;
- Ideal for daily consumption, cooking, and beverages;
- Suitable for cosmetic purposes, inhalations, and compresses.
